SUMMARY

Senior-level frontend and product engineer with 20+ years of experience architecting complex React and TypeScript applications across enterprise SaaS, consumer commerce, healthcare, and clean energy. Led frontend initiatives, established reusable application patterns, and translated complex operational workflows into polished, scalable customer experiences.

RECENT WORK

- AI-assisted development: Claude Code, Codex, Gemini, Cursor, Copilot; spec-first workflows, rapid prototyping, debugging, refactoring, and implementation planning.
- Built and launched [The Crumb](#), an AI-powered product using Claude Vision to analyze images and return structured user feedback on baking topics. Owned product design, React frontend, backend, database, and deployment.

EXPERIENCE

ChargePoint — Staff Frontend Engineer (Jan 2021 – Apr 2026)

Led frontend architecture and development for ChargePoint's Fleet Charging platform, building scalable React and TypeScript applications for managing connected charging infrastructure.

- Partnered with product, design, backend, and platform teams to ship React/TypeScript product surfaces from concept through production
- Developed reusable UI patterns, accessible components, drag-and-drop tables, and form systems that improved consistency across frontend teams
- Created schema-driven form systems for configuring complex energy tariffs, including time-of-use pricing, seasonal schedules, demand charges, and critical peak pricing.
- Designed and built the Depot Map Designer, a highly interactive self-service tool for configuring charging layouts using real-time operational data
- Mentored engineers and influenced frontend architecture, code quality, accessibility, and implementation practices across teams

Kaiser Permanente — UI Architect (May 2020 – Jan 2021)

- Sole frontend engineer on a greenfield inventory application to assist in operations management of thousands of Northern California physician and clinic touchscreen devices used for video visits.
- Owned frontend architecture from initial concept through production delivery
- Defined UX flows, produced wireframes/mockups, and delivered the full React/TypeScript frontend with supporting Node.js APIs

Freelance / Contract — Applications Developer (Nov 2019 – May 2020)

- Worked with high-growth technology companies including Chegg and Experian.
- Delivered React, Next.js, Node.js, and CMS-based applications

Tesla — Senior Applications Developer (Jan 2015 – May 2019)

- One of the tech leads on Tesla's vehicle configurator team, building consumer-facing discovery, customization, and purchasing flows using React, Redux, Node.js, Express, and Elasticsearch
- Partnered with design, product, localization, and accessibility stakeholders to deliver polished commerce experiences across global markets
- Built A/B testing and feature rollout workflows using LaunchDarkly to validate new product features and reduce release risk
- Configured CI/CD for frontend unit testing strategy using Jasmine and React-Testing-Library

Power-One — User Experience Engineer (Oct 2010 – Sep 2014)

- Led a small frontend team delivering energy-related reporting and visualization interfaces for solar and wind monitoring installations.
- UX Design. Frontend Development

Fat Spaniel Technologies — Web Application Engineer (Aug 2008 – Sep 2011)

- Led UI development and UX design for an energy monitoring platform, building dashboards, charts, and reporting tools. Helped transition the product from Adobe Flex to modern HTML5/CSS3 technologies.
- UX Design. Frontend Development

EARLIER EXPERIENCE

- Protrigga Design - Interactive Advertising (Partner) 2005 - 2009
- CaratFusion (Flash Development/PHP/Javascript) 2005 - 2006
- Academy of Art (Instructional Designer) 2004 - 2005
- County of Humboldt (Senior Applications Developer) 2002 - 2004
- College of the Redwoods (Associate Faculty) 2002 - 2003

Early career focused on full-stack web development and interactive media across advertising, government, and education sectors.

SKILLS

Frontend: React, TypeScript, Next.js, Tailwind CSS, TanStack Query, Redux, MobX, component systems, design systems, accessibility/WCAG, rapid-prototyping, responsive UI, data visualization

Backend: Node.js, Express, Next.js, Hono, PHP, PostgreSQL, MySQL

Testing & Tooling: React Testing Library, Jasmine, Vite, Rspack, Storybook, GitHub Actions, CI/CD

Cloud: Docker, AWS

AI Development: Claude Code, Codex, Gemini, Cursor, GitHub Copilot. Spec driven development.

Some experience with
Django / Python

EDUCATION

Humboldt State University - 2000

B.A. Physical Geography / Geographic Information Systems
Minor: Environmental Ethics

Contra Costa College - 1997

A.A. Liberal Studies
